

Who Is Satoshi?

White Paper

Sato.Wiki project

Together we will find out who is that Genius of the 21st century creating
Bitcoin

Sato.Wiki is not a place for hatred, abuse, discrimination, disrespect, profanity, meanness, harassment, or spam. We do not use the services to promote violence, degradation, subjugation, discrimination or hatred against individuals or groups based on race, ethnic origin, religion, disability, gender, age, veteran status, sexual orientation, or gender identity.

Why?

- To find out and let the world know about that genius person of the 21st century: **Satoshi!**
- To stop any speculations about **Satoshi** causing Crypto market vulnerability.
- To create decentralized proof-driven wiki platform for people.

How?

We will take Blockchain technology and create proof-driven wiki platform.

This will be wiki platform with gamification elements to proof and validate any facts, researches and statements. **Sato.Wiki** platform users will be the ones who decides correctness of the information by voting.

First question and quiz task: Who is Satoshi?

Soon after ICO ends we will provide wiki platform and structure for slowing the big question!

The one who will solve this quiz question will be awarded: will receive crypto money! Award will be generated by the **Sato.Wiki** users!

What We Already Know

There have been a lot of speculations about who is **Satoshi**. Over the years there have been many guesses who is **Satoshi**.

There are many internet resources discussing this:

- <https://bitcointalk.org/index.php?topic=2294666.0>
- <https://www.quora.com/Who-is-most-likely-Satoshi-Nakamoto-the-inventor-of-Bitcoin>
- https://en.wikipedia.org/wiki/Satoshi_Nakamoto
- https://www.reddit.com/r/Bitcoin/comments/6o0ygh/who_is_satoshi_nakamoto_founder_of_bitcoin/

There is still doubt about the real identity of **Satoshi**. Below are listed the most popular guesses:

- **Nick Szabo** - researcher Skye Grey posted a theory that Nakamoto was Nick Szabo, a researcher at George Washington University, based on textual analysis of writing samples.
- **Dorian Nakamoto** - Newsweek journalist Leah Goodman identified a Japanese American in California named Dorian Prentice Satoshi Nakamoto, based on his birth name, work history and a possible confession.
- **Hal Finney** - pre-bitcoin cryptographic pioneer and the first person (other than Nakamoto himself) to use the software, file bug reports, and make improvements. He also lived a few blocks from Dorian Nakamoto's family home, according to Forbes journalist Andy Greenberg.
- **Craig Steven Wright** - Wired wrote that Craig Steven Wright was Nakamoto due to various tips being sent to journalists, social media accounts (including an Amazon book review), blog posts and leaked emails.

There is no proof-driven answer yet!
Sato.Wiki wants to get a try!

Who We Are

Team of Blockchain enthusiasts! We will open our faces at the first day when **Sato.Wiki** will go Live! Be patient!

We are Blockchain developers and enthusiasts, we are people!
We are software developers for many years and it is not a problem for us to develop such wiki platform using any technological aspect.

We do not like to talk much and write long whitepapers, but we do keep our promises for sure!

What is Sato.Wiki

To solve this mystery “**Who Is Satoshi?**”, we have decided to build an unprecedented question & answer platform **Sato.Wiki**.

Sato.Wiki will be a decentralized question & answer community platform which will be built on blockchain technology where questions are asked and answered by community members.

Sato.Wiki goal is to solve the most complicated questions and reward community members for solving these questions.

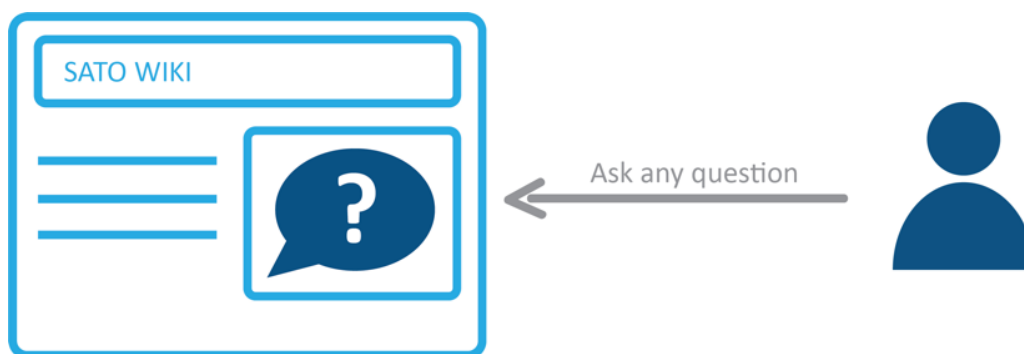

Sato.Wiki is the first decentralized question & answer community that rewards community members for solving the *global* unanswered question.

Sato.Wiki will use decentralized voting system to reward members for most reliable answers.
For rewarding community members **Sato.Wiki** will use unique cryptocurrency – **SatoWiki Token**.

How It Works

Asking

Every **Sato.Wiki** member will have the rights to ask any question.

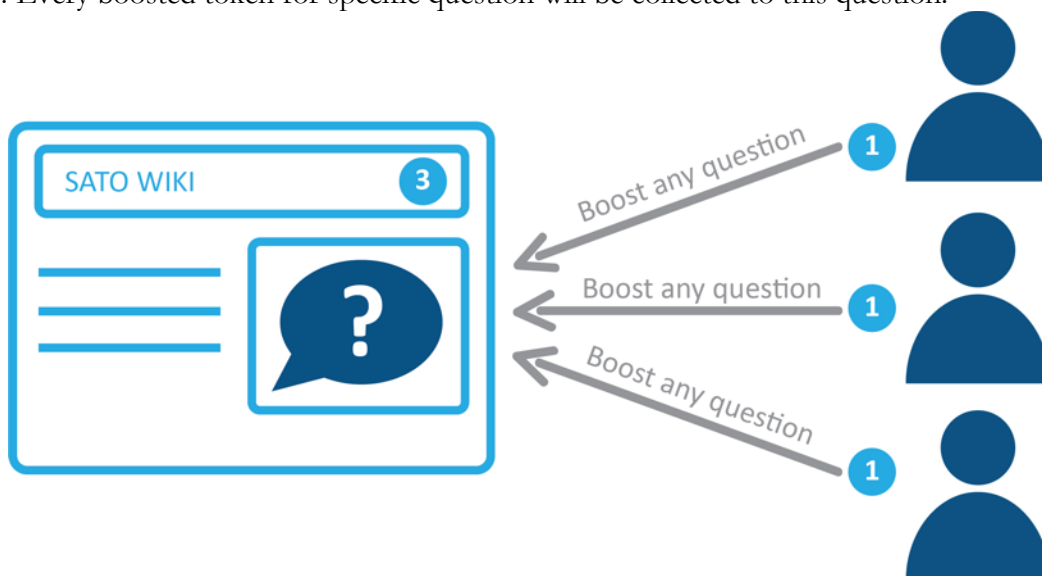

Boosting

Every new **Sato.Wiki** member will have at least 1 (one) **SatoWiki Token (SWT)**. Every new registered member will receive 1 SWT for start using **Sato.Wiki** platform when platform will be ready and launched.

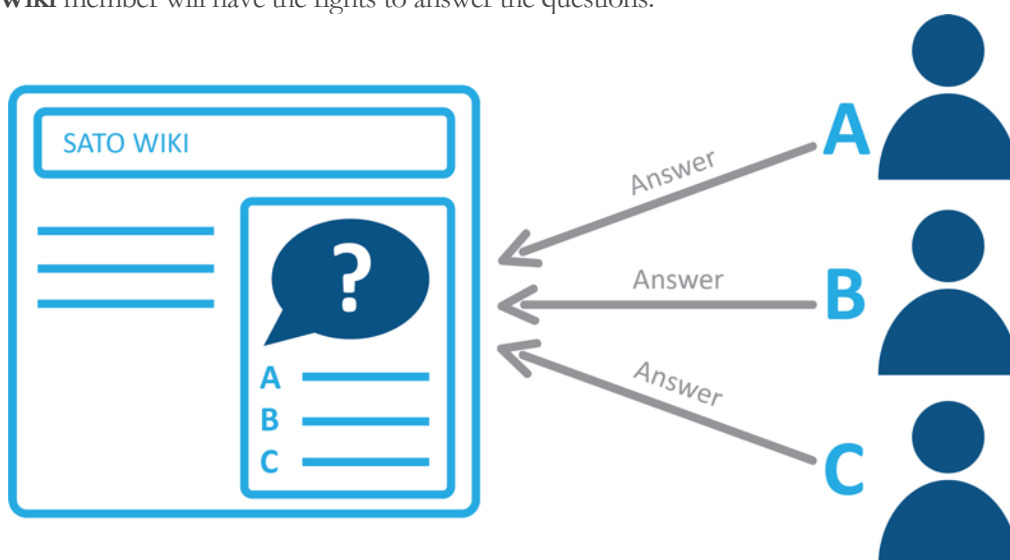

During ICO period You can buy SWT for very discounted price! You will be available to sell these tokens to new members via exchange.

Members will have the right to boost any question which will be considered the most important using SWT. Every boosted token for specific question will be collected to this question.

Answering

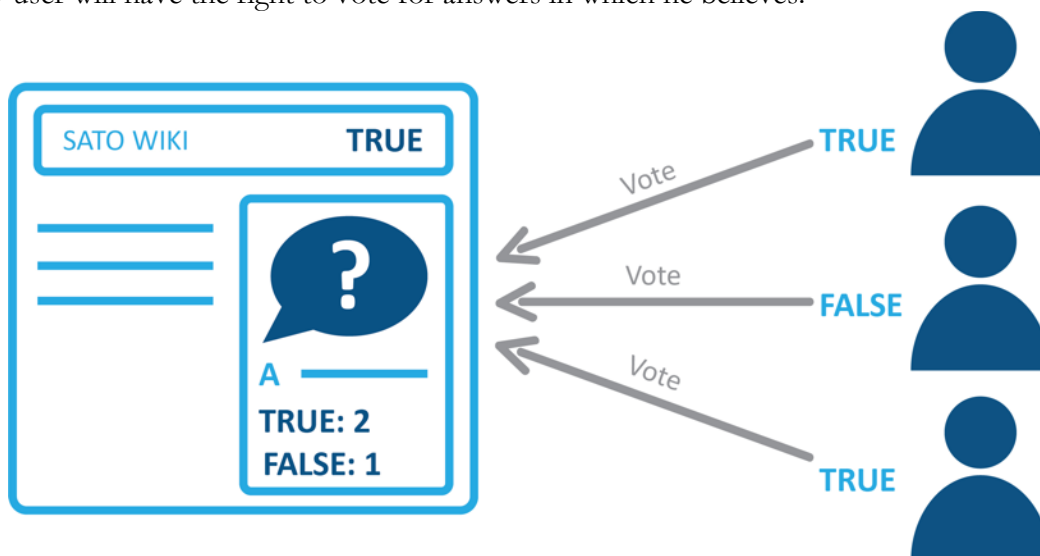

Every **Sato.Wiki** member will have the rights to answer the questions.

Voting

Sato.Wiki uses decentralized voting system to reward members for most reliable answers. Every community user will have the right to vote for answers in which he believes.

Rewarding

The answer that will receive more votes will graduate answer author with reward. Reward consist of all boosted tokens for this question.

SatoWiki Token (SWT)

We will deploy **SatoWiki Token (SWT)** as ERC20 tokens on the Ethereum network. Ethereum is the most popular and widely supported smart contract blockchain, with a huge development community and robust language support.

SatoWiki Token (SWT) is created only for **Sato.Wiki** community members.

SatoWiki Token (SWT) will grant their holders the right to boost most important questions and vote for most reliable answers.

Allocation

1 billion **SatoWiki Token (SWT)** will ever be created. The **SatoWiki Token (SWT)** are intended to be allocated as follows:

Phase 1 – ICO crowdsale.

- **60%** (600,000,000) to be sold by ICO crowdsale. SWT will be distributed at a rate:
10 000 SWT = 0.006 BTC
10 000 SWT = 0.15 ETH
10 000 SWT = 0.26 Litecoin
10 000 SWT = 0.113 Dash

We will deliver SWT to Your wallet 2 weeks after ICO ends. We will ask Your wallet after ICO ends please be awake! Or You can hold our tokens in our wallet for **Sato.Wiki** platform purposes.

Phase 2 – Get into Exchange.

- **20%** (200,000,000) will be reserve for Exchange purposes for late comers after **Sato.Wiki** platform launch. SWT will be distributed at starting rate:
10 000 SWT = 0.012 BTC
10 000 SWT = 0.30 ETH
10 000 SWT = 0.52 Litecoin
10 000 SWT = 0.226 Dash

We will get into Exchange platform for You to sell Your SWT if You will want to do this.

Phase 3 – **Sato.Wiki** platform is launched and expanding.

- **20%** (200,000,000) to be distributed to the new community members. Every new **Sato.Wiki** registered member will receive 1 (one) **SatoWiki Token (SWT)** to start using platform and participating.
So we count to get 200 million new users for **Sato.Wiki** platform around the globe. This will certainly boost and rise SWT token value in the future.

Sato.Wiki project have soft cap of funds for 1 000 000 SWT sold or equivalent fiat value. If we receive less, then every penny collected will be invested/donated to some other interesting social ICO project. We will look at the ICO calendars and will choose. We will keep You informed.

Affiliate

We will not use big funds for social marketing, but we want to say thanks and give back something for people who are helping this idea to happen. We use simple and generous affiliate program: Uni-Level marketing sales.

From every dollars or crypto coins donated by the users, 55% of funds will be directed to the **Sato.Wiki** affiliate program (these funds will be will be given back to **Sato.Wiki** messengers).

45% of funds will be directed to the **Sato.Wiki** fund (these funds will be used towards the creation of the **Sato.Wiki** platform, and all related expenses).

How it works

Firstly, as an affiliate you must register to our ICO to declare your interest in our affiliate program. The affiliate amounts will be tracked in BTC, DASH, LTC, ETH and XMR. Affiliates that refer participants to the ICO will earn coins (BTC, DASH, LTC, ETH, XMR) proportionate to the amount contributed by the investor.

Affiliate bonus distribution from:

- Level 1 – 25%;
- Level 2 – 10%;
- Level 3 – 7%;
- Level 4 – 4%;
- Level 5 – 3%;
- Level 6 – 2,5%;
- Level 7 – 2%;
- Level 8 – 1%;
- Level 9 – 0,5%.

For example:

- Peter refers John to our ICO and John contributes **100 BTC** for SWT. Using our affiliate program Peter qualifies for a Level 1 referral payment from John of **25%**. Peter will now receive **25 BTC**.
- Next, John refers Anna to our ICO and Anna contributes **1000 ETH** for SWT. Using our affiliate program Peter qualifies for a Level 2 referral payment of **10%**, John qualifies for a Level 1 referral payment of **25%**. Peter will now receive **100 ETH**, John will now receive **250 ETH**.

Affiliate payments can be withdrawn immediately from user's accounts.

Withdrawal only in Crypto.

Minimum withdrawal equivalent **50 USD**.

Any tax payments and public liabilities are user's responsibility. We will not take care of this.

Roadmap
